

READ THIS FIRST! – QUICK START

The Volatizer® VM3™ is different than anything you've used before. To ensure optimal results read this before you do anything. For detailed instructions refer to the User's Manual. Follow the quick steps below to use and enjoy the most compact and efficient vaporization device available.

IDENTIFICATION OF VM3™ COMPONENTS

FEATURES OF THE VM3™ AND REMINDERS AS TO ITS USE

- 1. SAFETY FEATURE:** The VM3™ cannot be turned on unless the mouthpiece is fully extended. Retracting the mouthpiece and closing the mouthpiece cover automatically turns off the unit.
- 2. SAFETY FEATURE:** The heating element cannot be energized and will not function if the cover of the vaporization chamber compartment is open or not completely closed.
- 3. TEMPERATURE SETTINGS:** Depending upon the age, blend, cut and moisture content, tobacco vaporizes at 230°-250° C. Most herbs vaporize at 190°-250°. However, the moisture content, potency and essential ingredients of botanical constituents vary. No two constituents are the same. Therefore, you must experiment with different amounts and temperature settings. Always begin with a small amount and a lower temperature setting and work your way up. Do not exceed 250° C. After vaporization the tobacco or herb should be brownish and dry, not burnt. When crumbled between your fingers it should turn to dust.
- 4. AMOUNT:** For finely ground herbs and tobacco, enough to cover the bottom of the vapor chamber and no higher than the interior ridge the mesh lid seats against. Less is better. No need to pack the chamber. Be sure and twist and seat mesh lid. For essential oils one drop on a small ball of cotton inserted into the vapor chamber.
- 5. INHALATION:** Inhale slowly and deeply for 5-10 seconds. Hold breath for a few seconds before exhaling. Be sure and keep the heat button depressed as you inhale. Do not cover the air intake slots with your thumb. If the outside air is colder than normal, set the temperature 10°-20° higher to compensate.

6. **CLEANING:** Blow out any loose debris. Using the brush, tweezers or a Q-tip moistened with alcohol clean the ceramic vaporization chamber, the vaporization chamber compartment and the internal screens after use.
7. **CONSERVING BATTERY:** Retract mouthpiece and close mouthpiece cover after use to conserve the battery.
8. **CAUTIONS:** Only use herbs and essential oils that you are familiar with. Be extremely cautious vaporizing tobacco. Nicotine is a poison. A nicotine overdose can be fatal. Do not use more than one ceramic vaporization chamber of tobacco every 4 hours until you have greater experience with the VM3™. Do not use the VM3™ or any other vaporizer if you are pregnant, ill or under a doctor's care. Do not allow children or minors to use or handle the VM3™.
9. **BEFORE USING THE VM3™:** Review the VM3's™ User's Manual on our websites at www.volatizer.com and www.vm3revolution.com to completely familiarize yourself with all Volatizer® products, educational materials, and scientific references.

MOST COMMON MISTAKES IN USING THE VM3™

1. **Using too much tobacco or herb.** Less is better. Packing the ceramic chamber defeats the vaporization process and wastes product.
2. **Neglecting to finely grind the tobacco or herb.** The more finely ground the constituent, the easier it is for the essential ingredients to be vaporized.
3. **Inhaling or exhaling too quickly.** Inhale slowly and deeply for then hold breath for a few seconds before exhaling.
4. **Forgetting to hold the heat button down as you inhale.** Holding the heat button maintains the proper temperature during the inhalation process.
5. **Covering the air intake slots with your thumb.** As you inhale you are drawing outside air through the air intake slots in the vaporization chamber cover. Covering the slots with your thumb prevents proper airflow.
6. **Failing to keep the internal screens clean.** In order to maintain proper airflow, you must make sure there is no debris or residue blocking the internal screens. A clogged screen prevents the proper flow of vapor.

WARRANTY

The VM3™ carries a ten day 100% satisfaction money back guaranty, a 90 day warranty on parts and labor, and a six-month warranty on the battery. We believe the VM3™ is the best vaporizer on the market and we want you to be completely satisfied.
